

EQUIPMENT RENTAL

Portable Storage PIGs

MATERIAL DELAYS ARE A THING OF THE PAST

Mintek Resources offers portable storage PIG rentals to keep your equipment full of product and your crews working. Storage PIG rentals increase your jobsite productivity by reducing delays due to outside factors, specifically material deliveries. With an onsite storage solution, you can receive deliveries any time, even if work crews are not present. Storage PIGs are ideal for large jobs with high production volumes that require onsite storage, small jobs with tight project timelines, jobs in locations with long-haul deliveries and more. Every rental includes a full maintenance program, and our service network is ready to respond quickly if support is needed.

For more information on PIG rentals or to check availability in your area, give us a call at (937)431-0218 or visit our website.
